

The National Junior College Information and Technology Summit

學校要聞

【Reported by Qian-jing Chen, Tamkang Times】

On the November 14th and 15th TKU held the Annual National Junior College Information and Administration Summit at the Fullon Hotel Danshuei Fishermen' s Wharf. Over 150 individuals from government informational organizations, academic institutes and specialized property management groups were gathered to discuss innovative services to form a more socially interactive campus. The four major areas of discussion were the usage and management of Mobility, Cloud, Social and Big Data networks.

President Chia-I Chang stated, “We have been promoting an information-oriented educational system for over 40 years. Who would have known that at the time of implementing computers into our education, that computers would grow to have such a deep impact on everyone' s lives all over the world?”

The dean of the Department of Information and Technology Education, Professor Stephen Yang stated, “ Along with the changes in technology involving software and the internet there have been four major developments: Mobility, Cloud, Social and Big Data technology. It is crucial that our system of education remains flexible so that we can utilize these technological advances in order to promote a more versatile way of learning.
