

TKU' s 118th Sister University

學校要聞

TKU has added a new name to its extensive list of prestigious overseas partner institutions. Osaka Prefecture University (OPU) became TKU' s 118th overseas sister university and 27th Japanese sister university after a formal signing agreement held at OPU on August 24, 2012.

The relationship between the universities can be traced back to a visit made to OPU by Prof. Wang Bo-Cheng (Dean, TKU College of Science) and Prof. Wang San-Lang (Professor, TKU Department of Chemistry) in April this year. At the time, OPU praised TKU' s ongoing efforts to enhance the quality of its instruction, research, and administrative services.

Dean Wang noted that OPU is a well-known comprehensive university, renowned for its instruction and research in the area of biochemistry. In the future, a member of OPU will visit TKU and select one Tamkang Master' s student to take part in a short-term joint research program at OPU.
