

## Reaching Consensus on Dual-Degree Programs with QUT

學校要聞

The TKU Center for Cultural and Creative Industries recently reached an agreement with the Creative Industries Faculty, Queensland University of Technology, to establish undergraduate and postgraduate dual degree programs.

Students from the Department of Information and Communication will be able to apply for the dual degree program starting from the beginning of the 2012–2013 academic year.

TKU forged the dual-degree initiative to give its students a wider choice of overseas internship opportunities which will help students build competence in cultural industries globally. Under the program, TKU bachelor's students will spend their fourth year of study at QUT while master's students will spend their second year of study at QUT.
