

More Students Will Visit China This Summer

英文電子報

A team consisting of 27 students and assistants from Department of Aerospace Engineering will set off to China on June 28, and they are expected to come back on July 12.

Prof. Chen Ching-hsiang, their Chair, will be the leader of the team.

Their destination is Beijing Aeronautical University.

As we have learned from Prof. Chen, long before Dr. Feng Chao-kang became VP for Academic Affairs, TKU, he had struck up a deal with BAU because at that time, he was the Chair of Aerospace Engineering Department. In view of this past experience, the team feels like taking a homecoming trip and they plan to stay 2 weeks in Beijing doing research and study at the same time.

The scheduled curriculum will include: The Overall Aircraft Design, The Function of Aircraft Transmission, Structure and Its Latest Development, Civil Aircraft Air Dynamics, Helicopter and Aircraft Manufacturing Technique.
